Index to Volume XXXV, No. 1

Page citations are made to single pages; these are often the beginning of a chapter, section, or running discussion dealing with a topic.

Academic criteria and grading: 12
Achievement testing, evaluation of research in: 95
Acquiescence: 69
Administration of tests: 10
Anxiety: need achievement, 74; personality variables, 75; situational variables, 74
Attitude scales: 70

Body image and self-concept: 71

Comparability of tests and test scores: 43
Constancy of IQ: 18
Construct validation in relation to inventories: 58
Construction of tests: 9
Criticisms of testing: 6

Developments in testing: 7

Educational achievement, trends in measurement of: comparability of tests and test scores, 43; evaluative studies, 46; interpretation of test scores, 42; objectives and content of test development, 34; prediction and classification, 44; reference groups and norms, 40; technical aspects of test development, 36; techniques of administering and scoring tests, 39; test development, 34
Evaluation of research reviewed in educational and psychological testing: advances in achievement testing, 95; advances in measurement theory, 97; trends in measurement of noncognitive characteristics, 96; use of factor analysis, 93; utilitarian emphasis in relation to prediction, 94
Evaluative studies of tests of educational achievement: 46

Factor analysis: evaluation of use of, 93; of intellectual abilities, 19, 27
Factorial validities: 27

General mental ability, trends in measurement of: constancy of IQ, 18; factor analyses of intellectual abilities, 19; heredity and environment, 17; new approaches and tests, 20; nonintellectual factors, 18

Heredity and environment: 17

Interpretation of test scores: 10, 42
Item analysis: correction of item-total score coefficients for relevant item inclusion, 85; item selection, 84; psychological considerations, 82; special approaches, 86
Item selection: 84

Large-scale testing programs: 8

Measurement of change: 11
Measurement theory: academic criteria and grading, 12; change, measurement of, 11; evaluation of advances in, 97; special abilities in relation to, 25; validity, 11
Method and design in assessment of personality: 63
Methodology in relation to response set research: 70

Need achievement: 74
Noncognitive characteristics, evaluation of trends in measurement of: 96
Nonintellectual factors of general mental ability: 18
Norms: 40, 87
Norms and reference groups: 40

Personal needs of prospective women teachers: 70
Personality and creativity: 66
Personality, trends in measurement of: acquiescence, 69; anxiety, 73; attitude scales, 70; body image, 72; method and design in assessment, 63; methodology in relation to response set research, 70; need achievement, 74; personal needs of prospective women teachers, 70; personality and creativity, 66; personality variables, 75; response

Evaluative studies of tests of educational achievement: 46

Factor analysis: evaluation of use of, 93; of intellectual abilities, 19, 27
Factorial validities: 27

General mental ability, trends in measurement of: constancy of IQ, 18; factor analyses of intellectual abilities, 19; heredity and environment, 17; new approaches and tests, 20; nonintellectual factors, 18

Heredity and environment: 17

Interpretation of test scores: 10, 42
Item analysis: correction of item-total score coefficients for relevant item inclusion, 85; item selection, 84; psychological considerations, 82; special approaches, 86
Item selection: 84

Large-scale testing programs: 8

Measurement of change: 11
Measurement theory: academic criteria and grading, 12; change, measurement of, 11; evaluation of advances in, 97; special abilities in relation to, 25; validity, 11
Method and design in assessment of personality: 63
Methodology in relation to response set research: 70

Need achievement: 74
Noncognitive characteristics, evaluation of trends in measurement of: 96
Nonintellectual factors of general mental ability: 18
Norms: 40, 87
Norms and reference groups: 40

Personal needs of prospective women teachers: 70
Personality and creativity: 66
Personality, trends in measurement of: acquiescence, 69; anxiety, 73; attitude scales, 70; body image, 72; method and design in assessment, 63; methodology in relation to response set research, 70; need achievement, 74; personal needs of prospective women teachers, 70; personality and creativity, 66; personality variables, 75; response

set and/or social desirability, 67; self-concept, 71; simulation of personality, 65; situational variables, 74; social desirability, 68; subjects and experimenter, 65
Personality variables: 75
Prediction and classification: 44, 88
Prediction, utilitarian emphasis of research concerning: 94
Predictive validities: 28

Reference groups and norms: 40
Reliability: 86
Response set: 57, 67
Response set and social desirability: acquiescence, 69; attitude scales, 70; methodology, 70; personal needs of prospective women teachers, 70; social desirability, 68

Self-concept and body image: 71
Simulation of personality: 65
Social desirability: 68
Sources of information: testing programs, 6; tests and testing, 5
Special abilities, trends in the measurement of: factorial validities, 27; new measures, 29; predictive validities, 28; theoretical concerns, 25; validation studies, 27
Statistical trends relevant to measurement: correction of item-total score coefficients for relevant item inclusion, 85; item analysis, 82; item selection, 84; norms, 87; prediction and classification, 88; psychological considerations in item analysis, 82; reliability, 86; special approaches, 86
Strong Vocational Interest Blank, revisions in: 56

Techniques of administering and scoring tests: 39
Test development: objectives and content, 34; technical aspects, 36
Trends in testing, general overview of: academic criteria and grading, 12; administration, 10; construction, 9; criticisms, 6; developments, 7; interpretation of scores, 10; large-scale programs, 8; measurement of change, 11; measurement theory, 11; sources of information, 5; testing programs, 6; tests and testing, 5; validity of measurement theory, 11

Validation studies of tests of special abilities: 27
Validity: 11
Vocational interest, trends in measurement of: accepted methods, 53; construct validation, 58; current directions, 55; newer scales, 55; past trends, 53; persisting problems, 54; response set, 57; revisions in *Strong Vocational Interest Blank*, 56

Index to Volume XXXV, No. 2

Page citations are made to single pages; these are often the beginning of a chapter, section, or running discussion dealing with a topic.

Achievement: and self-esteem, 108; and teacher-pupil interaction, 133

Children's intellectual development: acquisition of language, 114; cognitive learning, 117
Children's social behavior: imitation, 125; social reinforcement, 122
Climate: 134
Cognitive learning: and experience, 118; Piaget and current approaches to thinking, 118; Piaget's position, 117
Commission on Science Education: 159
Comprehension in reading: 151

Decoding: 148
Disadvantaged groups, education for: educational programming, 144; mentally retarded, 141; relationship of social conditions to intellectual and language development, 143; socially disadvantaged, 142

Effectiveness, teacher: 110
Experience and cognitive learning: 118

Greater Cleveland Mathematics Program: 157

Illinois Elementary-School Science Project: 159
Imitation: antecedents of, 126; modeling influences, 125; response consequences to model, 126
Intellectual development of children: acquisition of language, 114; cognitive learning, 117; disadvantaged groups, 143
Interaction, systems for observing teacher-pupil: affective, 131; cognitive, 130; multi-dimensional, 131
Interaction, teacher-pupil: achievement, 133; climate, perception, and personality, 134; systems for observing, 130; teacher education, 136; teaching patterns, 131

Language, acquisition of: development of syntax, 115; other considerations, 116
Language development of disadvantaged groups: 143

Madison Project: 156
Mathematics programs for elementary school: concepts utilized, 157; Greater Cleveland Mathematics Program, 157; Madison Project, 156; School Mathematics Study Group, 154; Sets and Numbers Project, 156
Mentally retarded children: 141
Models: influences of, on imitation, 125; response consequences to, 126

Naturalistic studies of classroom learning: achievement and self-esteem, 108; psychological ecology, 107; teacher effectiveness, 110

Perception: 134
Piaget: 117, 118
Perceptual learning: 147
Personality: relation to climate and perception, 134; relation to social reinforcement, 124
Programming for disadvantaged groups: 144
Psychological ecology: 107
Pupil-teacher interaction: achievement, 133; climate, perception, and personality, 134; systems for observing, 130; teacher education, 136; teaching patterns, 131

Reading process, nature of: comprehension, 151; critical unit, 150; decoding, 148; perceptual learning, 147
Reading research and instruction: age for beginning training, 152; nature of reading process, 147; programed teaching systems, 151
Reinforcement, social: demographic factors, 123; personality and behavioral correlates, 124; social deprivation, 124

School Mathematics Study Group: 154
Science and mathematics programs, combined: 160
Science Curriculum Improvement Study: 158

Science programs for elementary schools: Commission on Science Education, 159; Illinois Elementary-School Science Project, 159; Science Curriculum Improvement Study, 158; University of California Elementary School Science Project, 158
Self-esteem and achievement: 108
Sets and Numbers Project: 156
Social behavior of children: imitation, 125; social reinforcement, 122
Social deprivation: 124
Socially disadvantaged groups: 142
Social reinforcement: demographic factors, 123; personality and behavioral correlates, 124; social deprivation, 124

Teacher education: 136
Teacher-pupil interaction: achievement, 133; climate, perception, and personality, 134; systems for observing, 130; teacher education, 136; teaching patterns, 131

University of California Elementary School Science Project: 158

Page citations are made to single pages; these are often the beginning of a chapter, section, or running discussion dealing with a topic.

Adoption of adult education practices: 187
Adult education agency clientele analysis: agency differences in clientele, 233; characteristics of adult education clientele, 232
Adult education enterprise: cooperative extension services, 172; libraries, 171; public schools, 170; related services, 174; university extension services, 173
Adult socialization: affective attitudes, 203; motivations, 202; perceptions, 203; social skills, 205; values, 206
Assessment of adult programs by participants and leaders: 185
Attitudes: affective, 203; and emotions, 194; concerning community development, 227

Change in personality with age: 195
Change in psychological abilities with age: 191
Characteristics of adult education clientele: 232
Community resources and needs: 228
Cooperative extension services: 172

Design of learning situations: 177

Evaluation of outcomes: adoption of practices, 187; assessment by participants and leaders, 185; comparative studies, 187; measures of knowledge and information, 186; research critiques and theory and instrument development, 188

Group as sociopsychological setting for adult learning: input, 210; operation, 212; output, 214
Group behavior: 225

Leadership and training: 224
Learning and learner: 194
Libraries: 171

Management of learning situations: environmental devices, 182; illustrative devices, 182; instructional leadership, 180; specific techniques, 181
Materials, methods, and programs for adult literacy education: developmental materials, 218; field testing of materials, 219; methods, 219; service and agency studies, 220
Measures of knowledge and information: 186
Methods: adult literacy education, 219; community and resource development, 224
Motivations: 202

Needed research in adult education: 240

Organization of learning situations: 178

Perceptions: 203
Procedures and methods in adult education for community and resource development: attitudes, views, and beliefs, 227; community resources and needs, 228; evaluation, 228; group behavior, 225; leadership and training, 224; procedures, 227; professional aspects, 226; social action and change, 226
Programming: design of learning situations, 177; management of learning situations, 179; organization of learning situations, 178
Psychology of adults: attitudes and emotions, 194; change in personality with age, 195; change in psychological abilities with age, 191; learning and learner, 194; rigidity and set, 192; theoretical approaches to change with age, 196
Public schools: 170

Research critiques: 188
Rigidity and set: 192

Social action and change: 226
Social skills: 205
Socialization, adult: affective attitudes, 203; motivations, 202; perceptions, 203; social skills, 205; values, 206

Theoretical approaches to change with age: 196
Theory and instrument development: 188

University extension services: 173

Values: 206

Page citations, though made to single pages, often indicate the beginning of a chapter, section, or running discussion dealing with a topic.

Administration: administrators, 352; governance, decision making, and management, 351; systems, 353
Analysis of government support: 366

Campus environment: college and student characteristics, 268; intellectual climates, 264; new scales and assessment procedures, 269; relation to productivity, 272; student and faculty subcultures, 269; student perceptions, 271
Changes in educational and vocational goals: academic major, 286; educational aspiration, 286
Changes in knowledge and cognitive skills: aptitude, 281; critical thinking ability, 281; grades, 280
Changes in personality: control groups, 283; evaluation of previous conclusions, 285; student values in relation to college behavior, 285
College and student characteristics: 268
College teacher: orientation and in-service training, 305; preparation, 305; recruitment, 304; satisfactions, 306; status and services, 306
College teaching: concepts and theories of teaching, 307; student and teacher characteristics, 312; teaching methods, 308
Community college programs: general studies, 294; programs, 295; semiprofessional and technical education, 296
Composition of federal interest and the diversity of higher education: 364
Curriculum development: course content, 339; curriculum change, 299; experimental courses, 338; general surveys, 339; scarcity of curriculum research, 299; trends and examples, 298

Discipline: 329

Early withdrawal from college: college factors related to withdrawal, 278; rate of attrition, 277; redefinition of the college dropout, 278
Educational programs: community college programs, 294; curriculum development in higher education, 298; flexibility in the undergraduate curriculum, 297; general and liberal education, 292
Effects of federally sponsored research in higher education: 367
Extraclass activities: 321

Faculty: 343
Federal support: 362
Finance and facilities: campus planning, 356; costs and productivity measures, 354; development programs, 355; long-range fiscal planning, 355; year-round use of physical plant, 356
Financial aid, employment, and placement: 326
Flexibility in the undergraduate curriculum: 297
Fraternities: 322
Freshman enrollment by major field: 253
Future relationship between institutions of higher education and the federal government: 368

General and liberal education: 292
Goals of the federal government and of higher education: 362
Government and education: analysis of government support, 366; composition of federal interest, 364; effects of federally sponsored research, 367; future relationships, 368; goals of the federal government and of higher education, 362; governmental responsibility, 362; legislative process, 364

Health services: 328
Housing: 324

Intellectual climates: 264
Interaction of student and environmental characteristics: 258

Legislative process: 364

New scales and assessment procedures: 269
Noninstructional services: discipline, 329; extraclass activities, 321; financial aid, employment, and placement, 326; fraternities, 322; health services, 328; housing, 324; orientation and faculty advising, 320; programs and personnel, 318; religious activities, 323; research and evaluation functions, 329

Organization: theory, 349; measurement and description, 350
Organization and administration, finance and facilities: administration, 351; finance and facilities, 353; organization, 348
Orientation and faculty advising: 320
Outcomes of college: changes in educational and vocational goals, 285; changes in knowledge and cognitive skills, 280; changes in personality, 282; early withdrawal from college, 277; persistence of change, 288

Persistence of change: 288
Professional education: curriculum development, 338; faculty, 343; students, 335; techniques and materials of instruction, 340
Programs and personnel: 318

Relation of college environment to productivity: 272
Religious activities: 323
Research and evaluation functions: 329

Students: characteristics, 336; enrollment, 253, 337; follow-up studies, 337; interaction of student and environmental characteristics, 258; persistence, 256; prediction, 255, 335; selection, 254; self-selection, 260
Student and faculty subcultures: anthropological studies, 269; empirical and theoretical contributions, 270
Student perceptions of faculty and fellow students: 271

Teachers and teaching: college teacher, 304; college teaching, 307; next steps in research, 313
Teaching methods: independent study, 309; instructional technology and media, 310; lecture and discussion, 309
Techniques and materials of instruction: programed instruction, 341; testing and grading, 340; use of television, 342

Index to Volume XXXV, No. 5

Page citations, though made to single pages, often indicate the beginning of a chapter, section, or running discussion dealing with a topic.

Achievement test performance: 403
Antecedents of language deficiency, 390: development of cognitive behavior, 392; development of comprehension, 391; effects of family interactions, 392; infant vocalization, 390
Articulatory characteristics of language usage: 395

Background studies in language development: 389

Characteristics of language deficiency, 393: articulatory characteristics of language usage, 395; qualitative characteristics of language usage, 395; quantitative characteristics of language usage, 394; sensory modalities, 394
Characteristics of socially disadvantaged children: home environment and family status, 377; language, cognition, and intelligence, 379; motivation and aspiration, 383; perceptual styles and patterns of intellectual function, 382; summary and outlook, 384
Comprehensive programs, 426: Demonstration Guidance Project, 426; Higher Horizons Program, 427; Philadelphia Public Schools program, 429; summary and evaluation, 429
Culture-fair testing: 404
Cumulative effects of social and cultural background: 418

Demonstration Guidance Project: 426
Development of cognitive behavior: 392
Development of comprehension: 391
Dropout programs: 437

Effects of family interactions on language development: 392

Formulations of a theoretical framework: 419

Higher Horizons Program: 427
Home environment and family status: 377

Identification and appraisal in the schools: 406
Infant vocalization: 390
Intelligence: 413
Intelligence test performance: 401

Language, cognition, and intelligence: 379

Language development in socially disadvantaged children: antecedents of language deficiency, 390; background studies, 389; characteristics of language deficiency, 393; conclusions and needed research, 396
Learning disabilities, 413: intelligence, 413; school achievement, 415
Learning disabilities and remediation in disadvantaged children: formulations of a theoretical framework, 419; learning disabilities, 413; programs for remediation, 420; reading and related factors, 416; summary and conclusions, 422
Linguistics and language patterns: 416

Motivation and aspiration: 383
Multiracial reading materials: 431

New approaches in appraisal: 408

Perception, conception, cognition, and vocabulary: 417
Perceptual styles and patterns of intellectual function: 382
Philadelphia Public Schools program: 429
Preschool programs: 434
Programs and practices in compensatory education for disadvantaged children: comprehensive programs, 426; dropout programs, 437; general comments, 438; multiracial reading materials, 431; preschool programs, 434; reading improvement program for migrants, 430
Programs for remediation, 420: programs with a limited research base, 420; research-based programs, 421; role of the teacher, 421

Psychoeducational appraisal of disadvantaged children: achievement test performance, 403; culture-fair testing, 404; identification and appraisal in the schools, 406; intelligence test performance, 401; new approaches in appraisal, 408; conclusion and some projections, 409

Qualitative characteristics of language usage: 395
Quantitative characteristics of language usage: 394

Reading improvement program for migrants: 430
Reading and related factors, 416: cumulative effects of social and cultural background, 418; linguistics and language patterns, 416; perception, conception, cognition, and vocabulary, 417; reading retardation, 416
Reading retardation: 416
Research-based programs for remediation: 421
Role of the teacher in programs for remediation: 421

School achievement: 415
Sensory modalities: 394
